Dear VigiFlow user,

VigiFlow is updated with some new features.

Data entry - duplication of sections

1. Some sections/subsections can now be duplicated with the entered data intact. This means that a new section/subsection is added with the data from the first section/subsection copied into it. The below icons indicate where duplication is possible:

2. The (+) icon for adding new empty sections has been moved to the right side throughout the interface, in order to be placed together with the duplication icon:

   Previous:
   
   ![Drug Section](image)

   Current:
   
   ![Drug Section](image)
